substitute PF 1

● Stronger together

When I started my apprenticeship as a chemical laboratory technician at Novartis in the summer of 1998, I didn't give much thought to my retirement. But over the years, I increasingly became aware of how important the work of the Board of Trustees is in providing us with a good pension.

A year ago, I was permitted to sit on the Board of Trustees of PF 1 as a substitute trustee and gain my first experiences there. During this period, I experienced the commitment of NAV members to us at first hand and how much can be achieved by working together. Thanks to regular training sessions and information from the pension fund and the NAV, I will be able to continue developing my skills and hopefully also make a valuable contribution.

With your support for my election to the Board of Trustees, I would like to work towards achieving a sustainable pension fund in which the returns are generated in line with ethical and sustainability criteria. Planning for the future affects us all and our strength stems from our concerted action.
