

EMANA®-Mask

BACTERIOSTATIC FACE MASK MADE OF EMANA® FABRIC
WATER-REPELLENT, WASHABLE AND REUSABLE

With Emana®-Mask we offer you a **very comfortable** protective mask.

It is **very lightweight**. While protecting yourself, **you can breathe and speak freely without obstruction**. It does not build up heat on the face, as its **thermoregulatory** properties keep the temperature stable.

Forget the skin irritations with subsequent rashes that arise when wearing paper masks all day.

The mask is made in Italy and serves the purpose:

- Thanks to a **fluorine-free, water-repellent treatment** (Setapret PFF), an anti-droplet barrier is created for both outgoing and incoming saliva. The water-repellent effect remains **until 30/40 washes**.
- To be a "hygienic" product that can permanently inhibit and limit bacterial replication through the **bacteriostatic certified Emana-Yarn®** (inherent).

Particularly **suitable for contact with the skin**, as it absorbs moisture and allows **transpiration**, for more comfort when sweating.

The **thermoregulatory** properties make it possible to keep the body temperature stable in different environments.

The Oeko-Tex certification is the most authoritative and internationally recognized. It guarantees the **safety of the technology, the raw materials used and the substances used in the production processes**. In particular, this article can also be worn by a toddler.

The product is entirely made in Italy.

Composition: 92% polyamide (EMANA®), 8% elastane.

EMANA®-Mask

Manufactured in accordance with Art. 23, Paragraph 4 + 5 of the COVID-10 ORDINANCE 3. *The protective mask does not meet the technical requirements of medical products and personal protective equipment (PPE).
