● **Secure and ample pensions, today and in the future!**

My work at Novartis over the past for 25 years has given me extensive experience and a strong desire to champion our employees and strive for an ample and secure pension scheme.

The coronavirus pandemic has highlighted the importance of a sustainable investment strategy for pension funds. In times of crisis and falling share prices, it is crucial to pursue a sustainable, diversified and successful long-term investment strategy. As a member of the Board of Trustees of our pension fund, I will work to promote investments that are not only financially sound, but also sustainable and ethical.

Stefan Melly

Biology | Vocational trainer for Office Assistant

A pension fund represents the largest component of many people's assets, which is also why it shouldn't only become relevant from the age of 50 onwards. I wish to play an active and fully committed role in shaping our future right now. For this reason, I would be delighted to win your trust and your vote.
